More than 380,000 Veterans live in Massachusetts. Many of them urgently need treatment for post-traumatic stress and traumatic brain injury—the most common and challenging of the “invisible wounds” of military service.

**Project 20-0** will train more than 2,000 clinicians, first responders, and community stakeholders in Massachusetts to be better equipped to serve the Veterans and their Families in their communities.

### How to Engage & Offer Assistance to an At-Risk Veteran:

1. **Observe**
   - Withdrawn, hopeless, reckless, agitated

2. **Hear**
   - “I wish I wasn’t here”

3. **Ask**
   - “Are you a Veteran or Service Member?”

4. **Assess**
   - “Are you thinking of hurting or killing yourself?”

5. **Call**
   - Offer to call the Veteran’s crisis line together. Dial 1-800-273-8255, press #1 to talk to someone

6. **Give**
   - Encouragement to seek therapy

### Home Base Clinical Programs Hosted by Certified, Licensed Providers

**Care, lodging, transportation, and food provided at NO COST to participants.**

**Intensive Clinical Programs**

Available to Veterans of all eras and Service Members from across the country, regardless of discharge status.

- **Two-Week ICP for PTSD**
  - One year’s worth of group and individualized evidence-based therapy offered over a two-week period.

- **Four-Day Accelerated Clinical Treatment (ACT) Program**
  - 30 hours of individualized evidence-based therapy offered over a four-day period.

**Telehealth Services**

Available to Veterans, Service Members, and Family Members across the Commonwealth.

**Online Mental Health Care**

Connect with mental health providers online for the following services:

- Medical Consultations
- Couples Therapy
- Family Therapy
- 1:1 Behavioral Therapy
- Substance Use Recovery Services
